## NON-DESTRUCTIVE MATERIAL TESTING

### Accredited testing procedures

- Radiographic test RT
- Ultrasonic test UT
- Magnetic particle testing MT
- Penetration test PT
- Visual inspection VT

## ADVICE & ANALYSIS

### Comprehensive and experienced

- Preparation of inspection plans and concepts
- Consulting on the selection of test methods
- Preparation of reference blocks for component testing
- Material determination (without surface damage)
- Coating thickness measurements
- Video endoscopy (from  $\varnothing$  8 mm)
- Roughness measurements
- Hardness measurements
- Pressure and strength tests
- 3D measurement with FARO Laser Tracker
- Customer trainings and workshops
- Advice on accreditation procedures

## KNOW-HOW AT FIRST HAND

From the non-destructive material testing to comprehensive consulting. We perform all necessary works.

## NDT TESTING LABORATORY

As a competent manufacturer we draw from a large pool of numerous approvals and certifications. We offer you the highest level of quality, working on the current state of the art and with the latest standards. Our test engineers are certified according to level 2 and 3 and have many years of experiences and expertise. And, of course, our services are available worldwide.

Please contact us and allow us to advise you.
